

AUTOMATED SENSE WIRE TENSIONER: PROJECT STATUS UPDATE 1

Cole Kampa

University of Minnesota

February 15, 2018

kampa041@umn.edu

Status & Milestones

- Proof of concept complete.
- Operational code to tension to $(80.0 \pm 0.5) \text{ gf}$ (limited by spring strength)
- Speed:
- Cost Estimate:

Use as many or few of these sections as you see fit.

Advantages

We compare to the current method of using a system of pulleys and a hanging mass.
